**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### *Information Disclosure Statement*

1. The IDS filed 6/21/06 has been considered and recorded in the file.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 8-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Vook et al. (US 2004/0178954).

Regarding claim 8, Vook et al teach a method in an transmitter of a multi-carrier system, said transmitter (102, fig. 1) transmitting one or more data streams over a set of M antennas 104 to a plurality of mobile terminals 101, comprising the steps of: transmitting a number of pilot sequences comprising an ordered set of symbols (fig. 5, step 504), wherein each symbol is associated with a predetermined time and frequency resource and a complex transmission weight for each antenna (para [0005], [0021]); adapting the transmission weights associated to the pilot sequences to achieve an optimization of an

Art Unit: 2618

objective function of the set of quality indicators, which the mobile terminals have derived from measurements of at least one downlink channel property (steps 510 – 514, fig. 5); transmitting said pilot sequences with the adapted transmission weights (step 516, fig. 5); and, transmitting one or several information streams using the one or several of the adapted transmission weights (step 516, fig. 5, para [0061]).

Regarding claims 9-12, the “wherein” and “adapted to” clauses are not given weight, see M.P.E.P § 2111.04.

***Allowable Subject Matter***

4. Claims 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 13, the prior art of record fail to teach that the step of adapting the transmission weights comprises the steps of: applying current and previous measurement reports and transmission weights to derive a subset of best weights; and, using said subset to generate the adapted transmission weights.
